RMS10D

6:00 light-up dial timer
automatically resets to zero
when door is opened

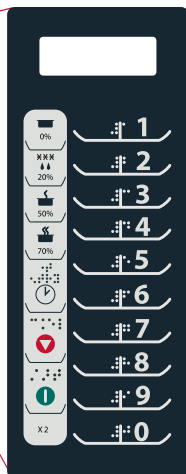

New!

RMS10T
RMS10TS

Control panel features easy
to understand icons &
Braille for ADA compliance

High Performance Has A *New Look!*

Designed for low-volume use, the RMS series is perfect for vending areas, break rooms or convenience stores. Available in dial (RMS10D) and touch program units (RMS10T, RMS10TS), all feature 1000 watts of power.

RMS Series vs...	The Competition*
Small exterior footprint; large capacity accommodates a 12" platter	Accommodates one 1/2 pan
Up to 20 menu programs for easy operation and minimal training	Only 10 menu programs; requires more manual operation & training
Dial automatically resets to zero if cooking is interrupted to avoid running with no load	Dial (NE-1024) has to be manually reset to zero if cooking is interrupted
RMS10TS is stainless steel inside and out to withstand commercial kitchen environments	Painted parts construction; window & door latch are prone to wear
Tempered glass outer window is durable, scratch resistant and see-through	Plastic outer window may become cloudy with use
Door testing exceeds commercial standards of 300,000 cycles	Lower testing standards diminish product quality
Exceeds industry standards for commercial performance	Closely resemble residential ovens that are not well suited for a commercial environment
Icons on control panel overcome language & literacy barriers	English-only controls are not appropriate for international markets or diverse staffs

*As compared to Panasonic models NE-1024, NE1054 and Sharp models R-21LCF, R-21LVF.
